FOLIO

FOLIO ROCKING

FOLIO è una innovativa poltrona relax a due posizioni pensata per l'outdoor, proposta su base fissa, con poggiatesta, oppure nella romantica versione a dondolo.

L'ampia scocca della poltrona è costituita da un unico foglio dal design sapientemente curvato in modo da permettere il movimento tra seduta e schienale sfruttando l'elasticità del materiale senza l'ausilio di elementi di congiunzione o di rotazione.

FOLIO is an innovative relaxing armchair, adjusting to two positions, designed for outdoor use. It is available with a fixed base and a footrest, or in a romantic rocking version.

The large structure of the armchair is made from a single perforated sheet. It has an expertly curved design that allows movement between the seat and back, exploiting the flexibility of the material without requiring any linking or rotating elements.

Variazioni di colore sono da ritenersi standard e naturali nei tessuti acrilici tinto filo. Posizionare in zone d'ombra - Colour variations are to be considered standard and natural in yarn-dyed acrylic fabrics. regeneration

Il nostro impegno nel realizzare prodotti dall'alto valore aggiunto e sostenibili per l'ambiente ci ha portati a inaugurare nel 2019 il programma industriale Regeneration per la produzione di arredi per esterno in plastica riciclata.

Li facciamo in uno stabilimento progettato con tecnologie all'avanguardia a livello impiantistico, dotato di presse a iniezione ibride ad alto risparmio energetico nelle quali il sistema di raffreddamento utilizza l'aria senza impiegare acqua e consumando pochissima energia elettrica. Quest'ultima è generata, in gran parte, da un sistema di pannelli fotovoltaici.

Regeneration è molto più di una semplice linea di prodotti in plastica riciclata e ci permette di sperimentare soluzioni applicabili su larga scala a tutto il ciclo produttivo coinvolgendo tutte le fasi, dall'ideazione dei singoli arredi fino al loro imballaggio.

Per quest'ultimo aspetto per la linea Regeneration tutti gli imballi di protezione e i relativi sostegni interni sono in cartone riciclato certificato FSC e polietilene a bassa densità completamente riciclabile, entrambi progettati in modo da ridurre al minimo il loro impiego.

Infine, ci impegniamo ogni giorno a mettere progressivamente in atto azioni per migliorare le nostre performance ambientali grazie alle analisi LCA (Life Cycle Assessment), metodologia analitica e sistematica che valuta l'impronta ambientale dei nostri nuovi prodotti lungo il loro intero ciclo di vita.

Per maggiori informazioni visita
www.nardioutdoor.com/regeneration

Our commitment to making environmentally sustainable products with high added value led us to launch the Regeneration industrial programme, in 2019, for the production of outdoor furniture in recycled plastic.

We make our products at a production plant designed with cutting-edge plant engineering technology. It is equipped with energy-saving hybrid injection presses, with an air-based cooling system without using water and consuming very little electricity. Most of the electricity used is produced by a photovoltaic panel system.

Regeneration is much more than a simple line of recycled plastic products. It allows us to experiment with solutions that can be applied on a large scale to the entire production cycle and involves all steps, from the concept creation of individual furniture items to their packaging.

For more information visit
www.nardioutdoor.com/regeneration

For the Regeneration line, all protective packaging and related internal supports are made of FSC-certified recycled cardboard and fully recyclable low-density polyethylene, both designed to minimise their use.

Lastly, every day we strive to gradually implement actions to improve our environmental performance by means of LCA (Life Cycle Assessment) analysis, an analytical and systematic methodology that assesses the environmental footprint of our new products throughout their entire life cycle.
